PROTON PDF Car Owner Service Manuals and Manuals, Wiring Diagrams above the page - Person, Arena, Jumbuck, Satria, Savvy, Waja; Proton Cars EWDs. The history of the Malaysian brand Proton began in 1983, the company began its business with the release of an authorized copy of the machine Mitsubishi Lancer. Over time, the company began to develop original models, but in 2010, the collaboration with the Japanese was resumed: the Proton Inspira sedan appeared, copying the Lancer again. In 2015, a partnership agreement was signed with Suzuki. The Proton brand is currently owned by DRB-HICOM, a private company. Proton or PROTON Holdings Berhad is an organization of automotive production, design, distribution and sale based in Malaysia. The company was founded in 1983 and is based in Selangor. Originally, Proton was a manufacturer of Mitsubishi Motors products reiterated in the 1980s and 1990s; but in 2000, the company designed and produced its first engineered non-badge car. This has led Malaysia to become the eleventh country in the world that can design and produce cars from the ground. Since then, the company has been producing many designed and locally engineered vehicles. Currently, more than 15 countries are the Proton car markets and most of them are in Asia. Currently, Proton is undergoing an important transformation process which is part of a long-term turnaround plan. The company, strongly dependent on the internal market, is making changes in its structure in the hope of regaining profits and increasing its presence in international markets. The concept was foreseen by the Malaysian government in 1979 and 1982, the project was approved by the Cabinet. In 1983, Proton was founded and entirely owned by the Malaysian government. At first, yes notorP notorP ,olledom 5891 otats "A otatlusir II .islam ilibomotua id enoizudorp amirp al emeisni erirtsoc id esiced e ihsibustiM a which was based on the Mitsubishi engine. Subsequently, few other models were launched that shared the Mitsubishi engine and one of the new models, Saga Iswara was widely used for commercial purposes in Malaysia. Among all the models launched until the end of the 90s they were made with the collaboration of Mitsubishi until the company started producing its indigenous car in August 2000. It has a Mitsubishi engine and this launch closed the reliability of Proton for the parts and platforms of the vehicle. So, in 2004, Proton launched the first car with the Malaysian manufacturing engine, Campro. In 2004, Proton increased his empire by purchasing 57.57 percent of the share of MV Augusta. But the misfortunes of MV Augusta also influenced the proton and the company has sold MV Augusta next year. So in the next part of 2000, Proton launched Saloon person as a replacement of Proton Wira. The external appearance was almost similar and had many new and advanced functionalities at discounted prices. It was an immediate success in Malaysia and recorded a huge volume of sales in the next period. In 2008, the collaboration of the product with Mitsubishi was resumed and Proton obtained the special rights for Ribadelli Mitsubishi Lancer from 2007. Proton Inspira was the collaborative result and this launch also strengthened the links between the two companies. From the beginning, Proton has actively maintained its presence in motor sports: Proton with the Japanese company Mitsubishi has participated in various Asian and international car gatherings. Mitsubishi was not the only company with which he collaborated and reiterated their cars, as he collaborated with several other car companies for their different models. The other companies he collaborated with are Citroen of France, Youngman of China, Honda Suzuki. When he collaborated with Suzuki, he reiterated their famous model erti. Protons of common protons the proton is the maximum maximum brand in Malaysia. The company used the Mitsubishi engines in its cars and then used the engines made by si ©. The technological support of the Japanese car manufacturer and highly progressive structures led him to produce the best cars in Malaysia. Cars are also exported to other countries. Here are some problems commonly found in different proton models that can be solved using the repair manuals. Very few car owners had these complaints and knowing them will lead to diagnosing problems in an initial phase of your car. Motor lights: in some G2 proton cars, users have experienced the lighting lighting light without any reason. Even after finding the engine in good condition, the light has not closed. The cause of the problem could be the defective wiring. Get your car controlled by an expert automotive technician or pass through the repair manual. Proleton distributor problem: in some proton cars, problems relating to the distributor have been commonly reported. A hall effect sensor is with which the units of proton distributor are connected. With the rotation of the distributor, ECU receives a signal and an impulse is sent to the ignition module that amplifies the current to be sent to the coil. In case of sensor malfunction, no signal that does not cause spark on the plug does not develop. The only solution to this problem is the replacement of the room sensor using the repair manual. Air flow meter: in proton cars, there is also a failure of the air flow meter. The quantity of air that passes into the engine is measured by the air flow meter. The operation of the air flow meter can be classified as the current quantity that it can register to keep the thread at a specific temperature. The error do not be detected in simple diagnostics and you can see the meter still working within the limits it is believed to be sufficient. To make it diagnose properly put the right amount of fuel, give full accelerator and the result will be a weak mixture and a lack of power. The good thing is that airflowThey are very easy to change and usually take only 5 minutes to fit. Switching: in some brands of Proton Waja, the owners complained about the fact that their cars were not starting properly and sometimes they had a cold start. The main cause of this type of problem could be a bad ignition coil and if the car does not start at all, the ignition coil may not have failed. In case of failure of the ignition coil, the correct amount of charge is not transmitted to the candle. This problem can relieve in the winter season and a replacement of the ignition coil will solve the problem. Fuel pump escape: some users of the Waja Proton model complained that during driving the car and acceleration, its speed was not increasing. This is a common problem in the WAJA model and the reason is the failure of the fuel pump. The replacement will bring the car back to normal. Conclusion These are some of the common problems that people have reported on the cars of the protonic brand. Not all cars suffer from these problems and if you are aware of it, you can quickly repair the car in time using the repair manual of the car. The purpose of this is to catalog and include one of the most comprehensive, useful and accessible "Automotive Repair PDF Manual" on the Web for all proton models. It is your source of reference to learn everything about Proton when you can't find elsewhere. To start, select the car model below... 400 2 manuals Person 4 Privacy overview This website uses cookies so you can offer the best user experience possible. PROTON Holdings Berhad is a Malaysian automotive company and automotive companies involved in the design, production, distribution and marketing of cars. Proton was founded in 1983 as the only national car company in Malaysia until the birth of Perodua in 1993. 'Proton' is an acronym for Bahasa Malaysia for Perusahaan Otomobil Nasional (National Automobile Company), Perusahaan Otomobil Nasional Berhad (PROTON) was incorporated in 1983. PROTON made the first car of Malaysia, Proton Saga, which commercially launched on 9 July 1985, from the Malaysian Prime Minister at the time, Dato' Seri Mahathir Mohamed, who initially conceived the idea of a Malaysian machine. However, before you tinker with the PROTON, make sure you have a PROTON service manual to get the job done right. The PROTON model range is as follows: Satria GTi, Waja, Wira, Iswara, Juara and Perdana V6. The range of engines 1.3, 1.5, 1.6, 1.8, and 2.0 L offers customers a wide range of motor options to choose from both locally and abroad. Mitsubishi Corporations and Mitsubishi Motors

Corporation were the shareholders, as well as being a technical assistance partner of PROTON and a component supplier. On December 30, 1996, he marked the inauguration of Proton Putra, a two-door coupe, to the public and the production of their billionth car from the Shah Alam plant. PROTON has taken a significant step in updating its engineering capabilities with the supply of Lotus Group International Limited, a British automotive engineering company and luxury sports car manufacturer. Together, PROTON and Lotus offered large-scale production capacity with world-class engineering skills. Today, the ovititepmoc ovititepmoc etnemafia li iuc art „odnom li ottut ni onatropse issE .ivititepmoc e vitavonni ilociev emoc elanoizanretni ollelvi a oihcram orol li odnecaf onnats NOTORP Kingdom and continental European auto markets. The PROTON brand continues to be a staple of the Malaysia's economy and doesn't appear to be going anywhere anytime soon. Make sure you grab your PROTON repair manual today! today!
